

Key Management System

ProxerSafe Mini 8K-H-Ø

ProxerSafe Mini 8K-H-0

Intelligent, small-sized cabinet for 8 keys, with 8 RFID key holder plugs, electromechanical lock, with touchscreen operated built-in computer. The key holder plugs are hidden behind the door containing the touchscreen.

Function

The ProxerSafe Mini 8K-H-0 key cabinet can be opened by authorized PIN only. The intelligent cabinet does not allow to take any keys, just those which the person is entitled for.

The cabinet identifies the person and the key, thus services like key reservation, disabling keys, searching keys are available.

Features

- Offline/ online operation
- Ethernet connection
- Powder-coated steel housing
- Door hidden behind the touchscreen (H)
- w/o RFID reader, cabinet can be opened with authorized PIN (Ø)
- Indoor design
- UPS
- With the KCS module of the ProxerNet KeySafe software running on the built-in computer

Options

- Wi-Fi communication
- Semi external design, can be placed outdoor under rain-roof
- Vandal-proof keyrings (highly suggested)
- 16 key holder plugs are available with additional slave cabinet

Services by the software (GUI) of the built-in industrial computer

- Stand-alone operation, uninterrupted offline operation in case of network outage
- Finding a key function (Where is the key of the meeting room? In which position? Who has taken it?)
- At identification the cabinet shows name or even photo if set so
- With admin rights:
 - Adding, modifying and removing users and key rights via the touchscreen
 - Issuing new PIN
 - Checking logs and booking information on the screen

For further extra functions (e.g. booking, alarm, more cabinets in one system), log query from remote computer, more comfortable and extended management, please ask for the ProxerNet software KeySafe module (running on remote computer).

ProxerNet software – KeySafe module

- Software for managing the cabinet from remote computer via Ethernet or Wi-Fi
- Managing multiple cabinets as one system (option)
- Finding a key function, even among multiple cabinets of the system
- It can operate together with other modules of the ProxerNet software, like Access control, Worktime, etc.
- Logs can be queried, filtered, exported
- Extra management functions (not available on the built-in PC):
 - Booking keys e.g. from 8 to 11am on the 10th the key of the meeting room is booked, and no one else can take it even if they have rights to do so in general
 - Setting alarms (in email or optionally in text message), e.g. when a key is not returned in time
 - Database import, uploading user database and card numbers at launch
- Operation settings, e.g. asking for odometer data at car keys
